Introduction

As a Computer Science and Engineering student at Daffodil International University, I am driven by a passion for leveraging technology to solve complex problems. My recent focus on machine learning has equipped me with the skills to analyze data, optimize processes, and develop innovative solutions. I am eager to apply my technical expertise in the banking sector, where I can contribute to enhancing financial services and driving digital transformation.

Career Objectives

- **Drive Innovation:** Seeking a banking role to apply analytical, financial, and technical expertise in delivering innovative solutions that enhance financial services and operational efficiency.
- **Leverage Technology:** Utilize knowledge in computer science and emerging technologies to develop data-driven strategies, optimize processes, and support organizational success in a fast-paced financial landscape.
- **Enhance Customer Experience:** Focused on improving customer experiences through technology-driven enhancements, ensuring the delivery of superior banking products and services.

Educational Qualification

2020 – 2024	Daffodil International University
Bachelor in CSE	CGPA: 3.32
2018	Bogra Cantonment Public School and College
HSC (Science)	GPA: 4.67/5.00
2016	Bogra Cantonment Public School and College
SSC (Science)	GPA: 5.00/5.00

Core Competencies

Financial Analysis & Management

- Basic understanding of financial markets, banking operations, and economic principles. Skilled in analyzing financial data and creating detailed reports.

Banking & Customer Service

- Effective communication skills for customer interaction and issue resolution. Proficient in MS Office for financial document preparation and presentations.

Technical Proficiency

- Proficient in Python, SQL, and Java for data analysis and automation. Knowledgeable in Machine Learning, focusing on predictive modeling. Strong grasp of Computer Networking and Database Management.

Soft Skills

- **Leadership:** Experience in leading projects and teams.
- **Adaptability:** Quick to learn new skills and adapt to changes.
- **Positive Attitude:** Maintain a positive outlook in challenging situations.
- **Teamwork:** Ability to work collaboratively in a team environment.

Relevant Projects

2024 – present	Financial Data Analysis Project Utilized Machine Learning techniques to improve prediction accuracy. Gained insights into financial markets and the impact of external factors on stock prices.
2023 – 2024	Sentiment Analysis on Pandemic and Current Global Conflicts: Bangladeshi Economic Perspective <i>Final Year Defense Project</i> - Analyzing Public Sentiment and Economic Impact through Direct Surveys in Bangladesh.

Academic Projects

2022	Diabetes Prediction A Machine Learning-based project to predict if a person has diabetes.
2022	Student Management System A bash script-based student management system.
2021	Cycle Lagbe? A modern website prototype (Using Figma)
2021	eSports Registration System eSports player registration system for esports players. (Using Java)
2020	Life Saver Ambulance booking mobile application prototype. (Using Adobe XD)
